

USER GUIDE FOR “ACPL FM220 RD” APPLICATION

1. Device Connection:

After connecting device to mobile it will display pop-up message to allow the application to access device. Give Permission for Device access.

1.1 Device Registration :-

This screen will be display if only your device was already registered. Otherwise your device automatically register when you connect Startek FM220 with Android device Or click on “REGISTER DEVICE” Button .

1.2 Re-Register Device:-

If you want to Re-Register your device please connect device and open menu option and Click on Re-Register menu tab .

1.3 Network Connectivity: -

Please check Internet connectivity before checking and testing device. In case of no internet connectivity, then it will display “No Internet” message.

2. Testing of Registered Device:

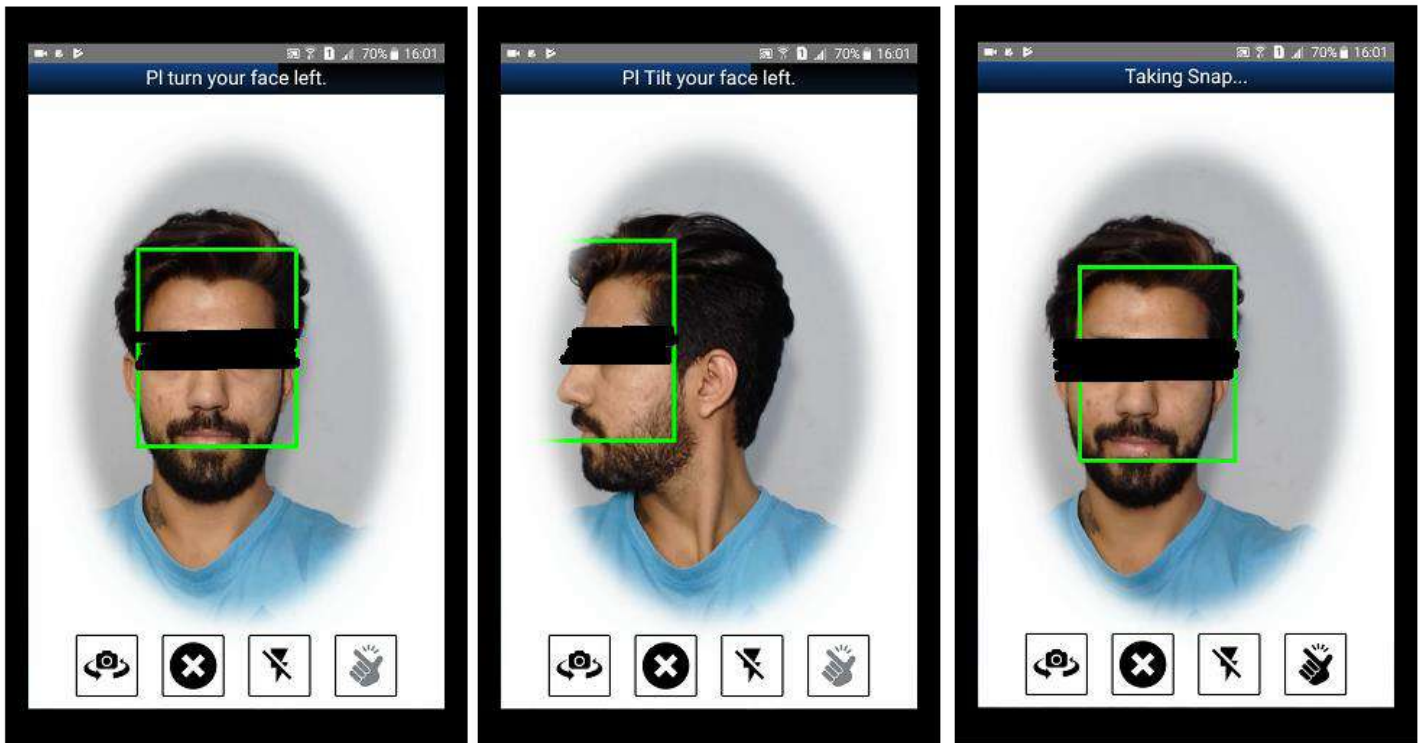

2.1 Scanner Testing:

- Now start taking fingerprint by clicking on “Scanner Test” Button.

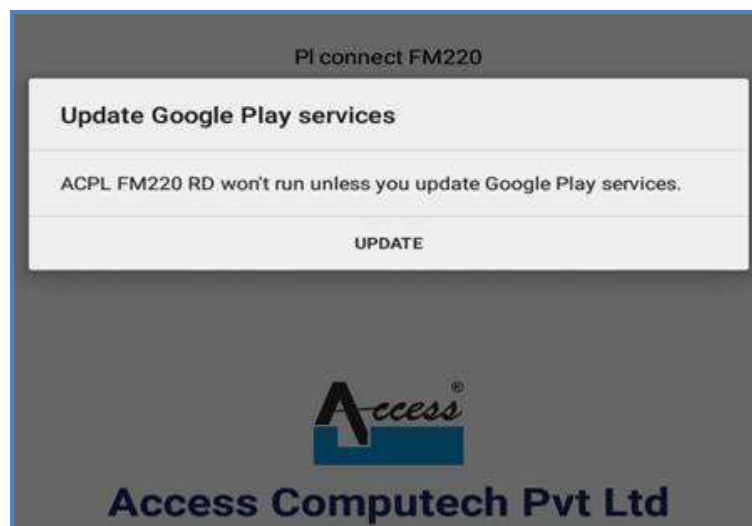

2.2 Capture camera Testing:

- Now start taking face capture by clicking on “Capture Camera” Button.

3. Google Play Service Not Updated:

After installing RD Service application, if Google Play Service of Android device is outdated/invalid, then a popup prompting to update Google Play Service will be displayed (as shown in screenshot).

Press update button to reach Google play store and update Google play service to use application.

In case you don't update Google play service, the "FM220 RD service application" will not work properly.
